

**1 REMOTELY SYNCHRONIZING A MOBILE TERMINAL BY ADAPTING ORDERING**  
**2 AND FILTERING SYNCHRONIZATION RULES BASED ON A USER'S OPERATION**  
**3 OF THE MOBILE TERMINAL**

**4**  
**5 ABSTRACT OF THE DISCLOSURE**

**6** A method and apparatus for remotely synchronizing a mobile terminal to a target  
**7** computer is disclosed. A user's operation of the mobile terminal is monitored and a computer  
**8** program is executed for adapting ordering and filtering synchronization rules in response to the  
**9** user's operation of the mobile terminal to generate a modified set of synchronization rules.  
**10** Synchronization data is exchanged between the target computer and the mobile terminal using the  
modified set of synchronization rules.
